

Managed SIP Trunking

Delivering Quality, Availability, and Visibility

mSIP from BCM One and nexVortex is our Managed SIP Trunking solution that caters to all sized businesses from small to enterprise level organizations offering voice quality, availability, and visibility.

› **Quality:** Multiple Connection Options

- BCM One/nexVortex peering relationships reduce latency, packet loss, and jitter by connecting directly to the BCM One/nexVortex mSIP network
- Edge router traffic prioritization
- Optional BCM One/nexVortex provided internet access with CoS

› **Availability:** Monitoring + Disaster Recovery

- Redundancy through multiple data centers
- LAN level autodetecting disaster recovery
- Optional dual WAN failover
- Toll-Free RespOrg

› **Visibility:** Eliminates Finger Pointing

- Call quality analytics taken at multiple points in call path
- Monitoring from customer premises outward
- Alarming with proactive notification

Redundancy through Multiple Data Centers
