

VOICE ENABLED TEAMS

NEXVORTEX VOICE ENABLED TEAMS

Gain the Benefits of Microsoft Teams at Your Pace

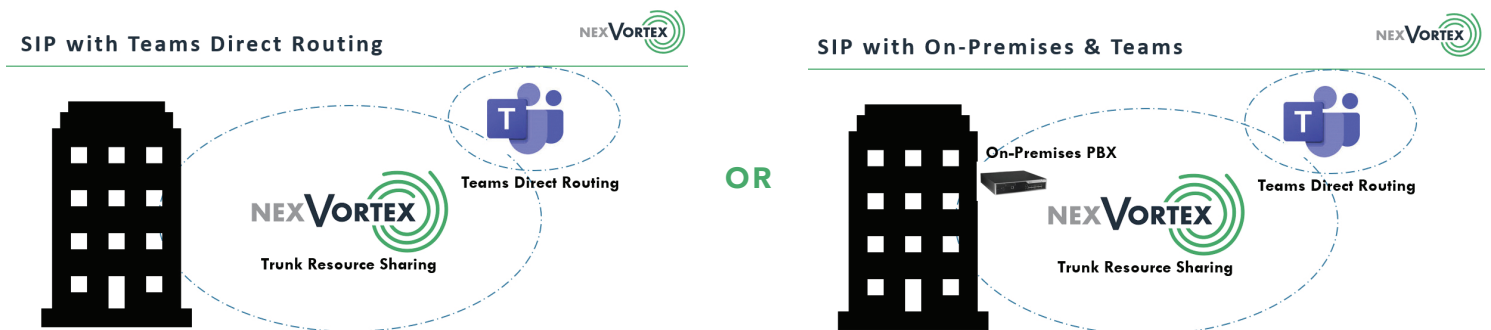

nexVortex Voice Enabled Teams solution paired with nexVortex SIP Trunking provides a powerful Direct Routing solution that allows you to execute an intelligent rollout strategy.

NEXVORTEX ADVANTAGE

- ✓ Migrate to Teams immediately or over time with nexVortex shared trunk resources for as low as \$3 per user
- ✓ No additional equipment is needed for Microsoft Teams Direct Routing
- ✓ Flexibility to add Teams users on either mSIP or SIP Line Plans
- ✓ Azure hosted SBCs configured for high availability
- ✓ Portal with user management and one-click synchronization
- ✓ Easy to get started with dedicated project coordinator

nexVortex unique trunk sharing capabilities allow you to simultaneously share calling resources and call paths with PBX systems and Microsoft Teams Phone System. Migrate immediately or over time when each department is ready with nexVortex shared trunk resources.

HOW TO GET STARTED WITH NEXVORTEX VOICE ENABLED TEAMS:

- ✓ For a low monthly price nexVortex provides Microsoft Certified Azure Hosted SBCs for Teams Phone System Interoperability
- ✓ Gain control by using high quality nexVortex SIP Trunks, numbers, and E911 for any of your licensed Teams Phone System users. nexVortex SIP Trunks allow you to hot cut your entire organization to Teams Phone System or migrate one department at a time while simultaneously powering your existing PBX system(s).
- ✓ nexVortex provided portal allows you to easily bond your nexVortex SIP trunks to your Teams Phone System
- ✓ nexVortex dedicated project coordinators manage the migration process

Contact nexVortex to see if a migration to Microsoft Teams Phone System makes sense for your organization.
